ON-BOARD BATTERY R/C

RCS has one battery R/C installation kit.

JST-SWITCH This has JST compatible wiring both IN and OUT. It is rated at 5 amps and has a Pre-wired 2.5 x 5 mm socket for charging. This accepts most plugs fitted to smart chargers.

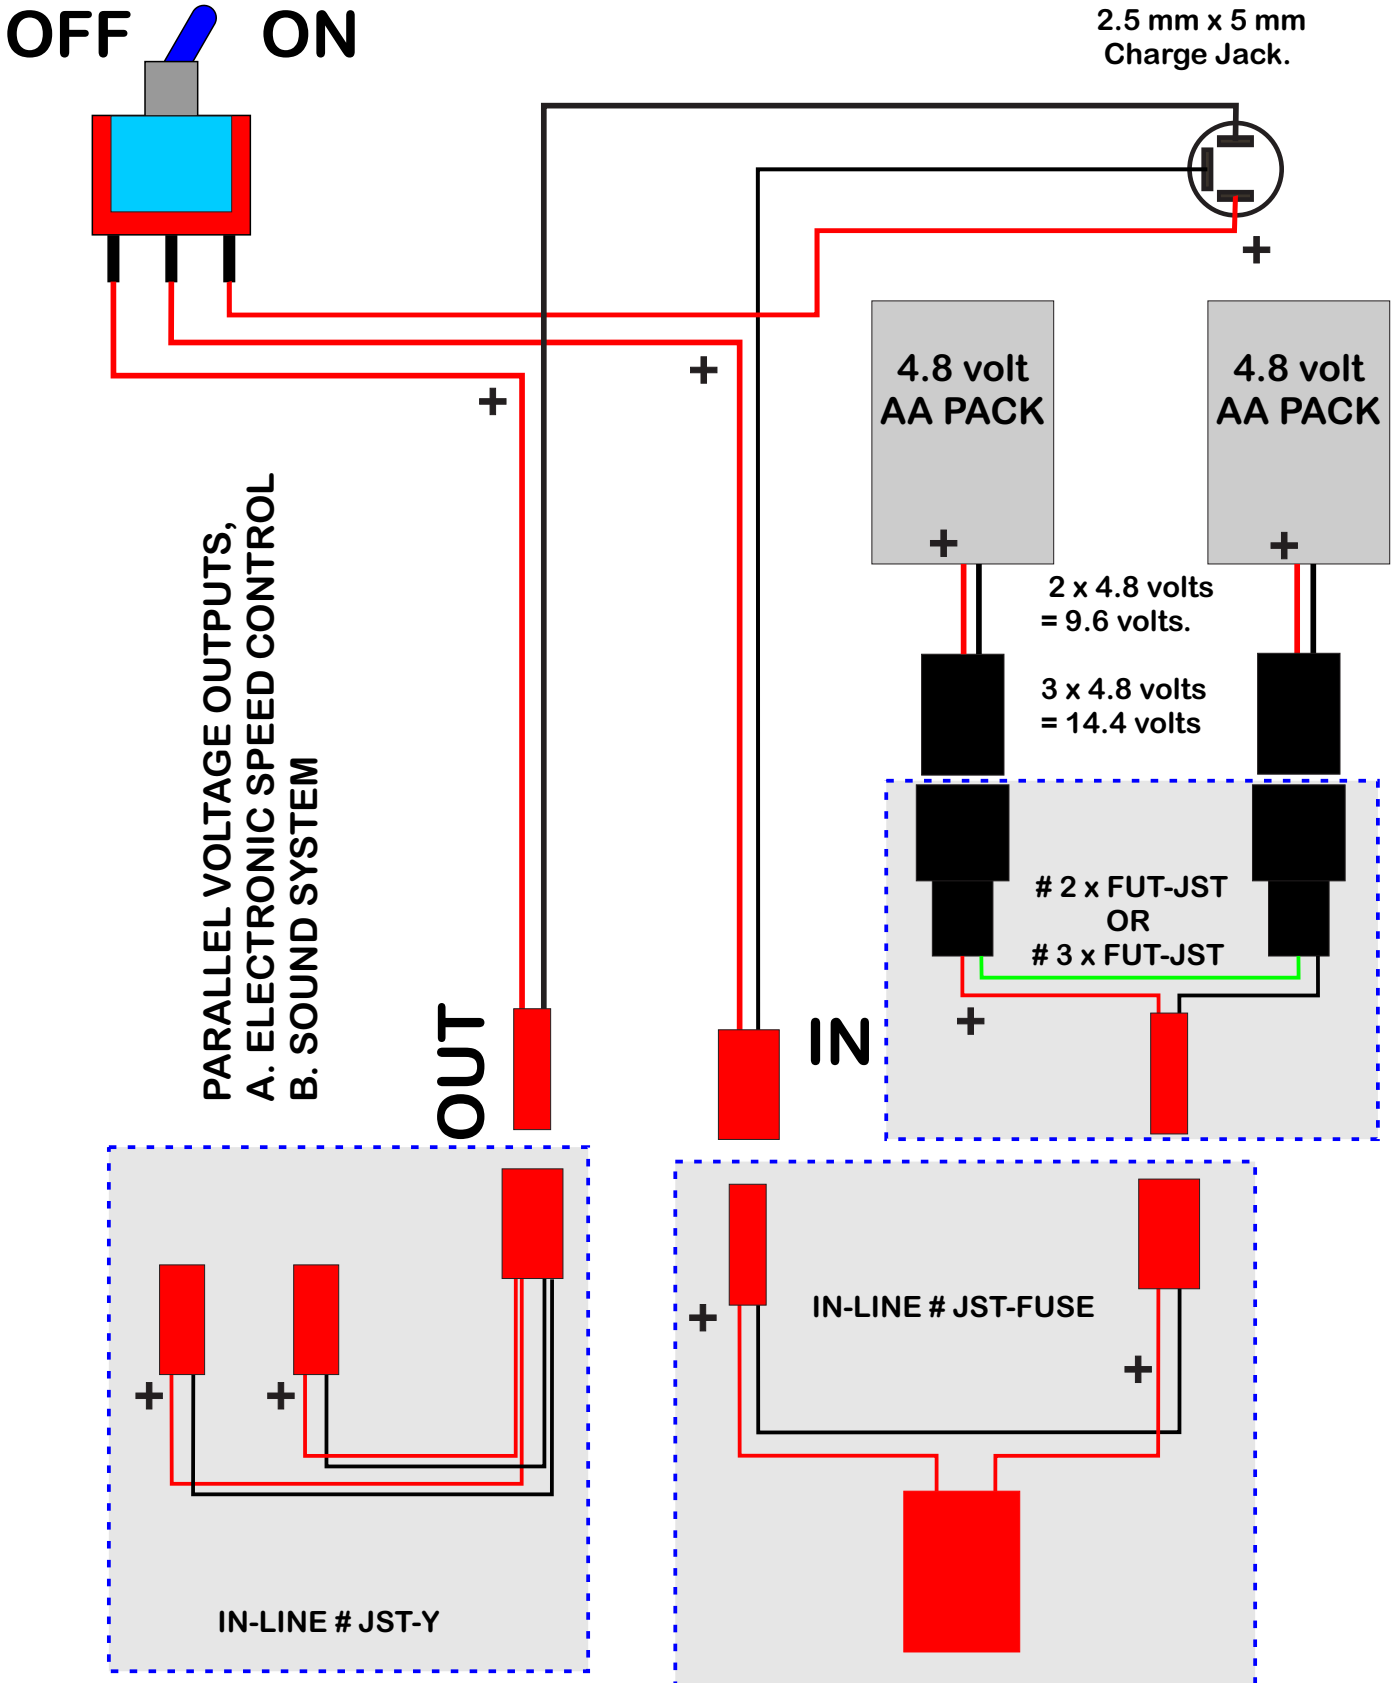

Each loom has a pre-wired SPDT Toggle switch. We strongly recommend using the JST-3A-FUSE They have an auto reset Polyswitch® & an in line plug and socket for Battery & ESC connections. A 5 amp # JST-5A-FUSE is available if needed. This kit will simplify the installation of battery R/C ESC's. Use with any brand of R/C or battery type. See following pages for suggested wiring plans. We also recommend using the # FUT-JST battery multiplier cable for 2 x times or 3 x times packs.

JST-SWITCH

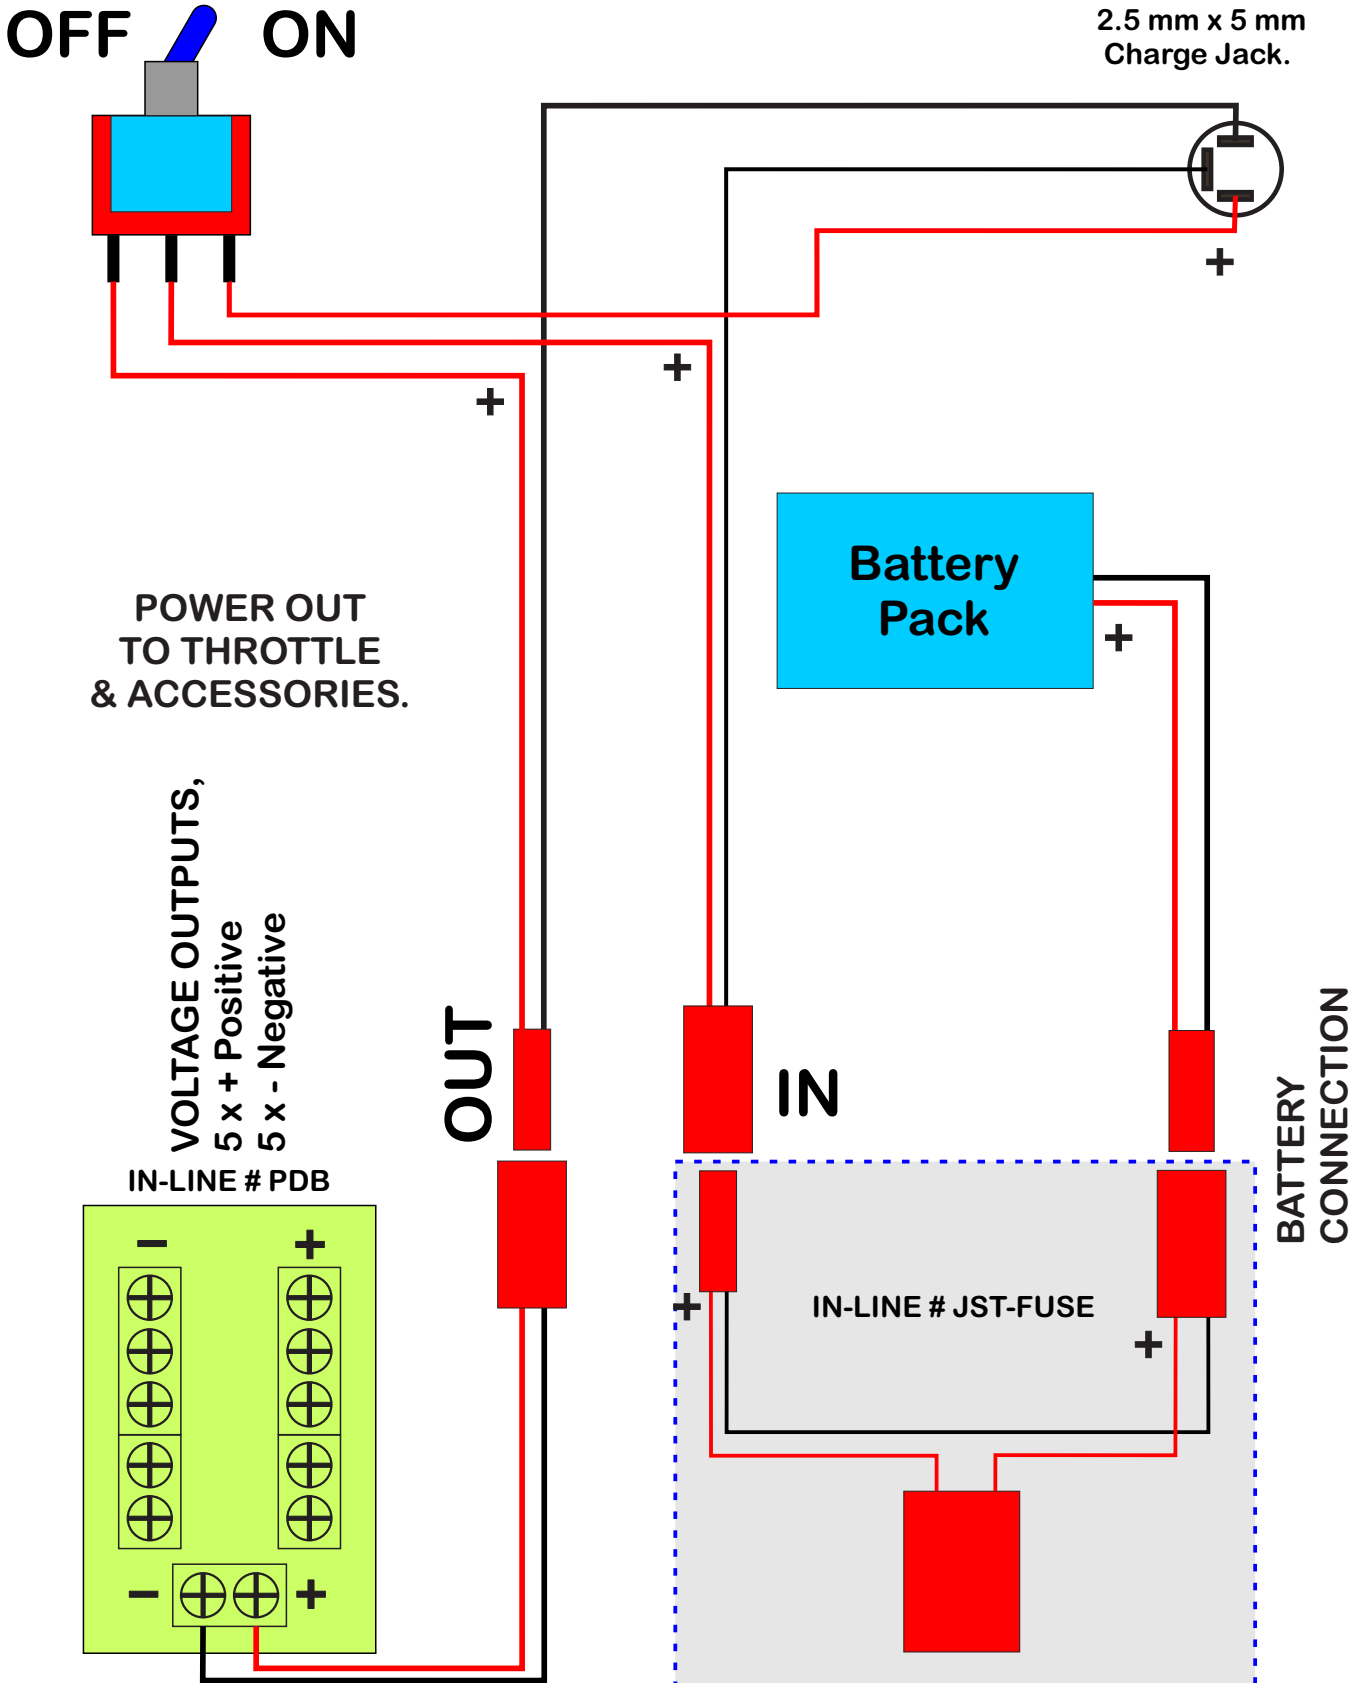

WIRING THE # JST-SWITCH.

SWITCH IS SHOWN IN THE ON POSITION.

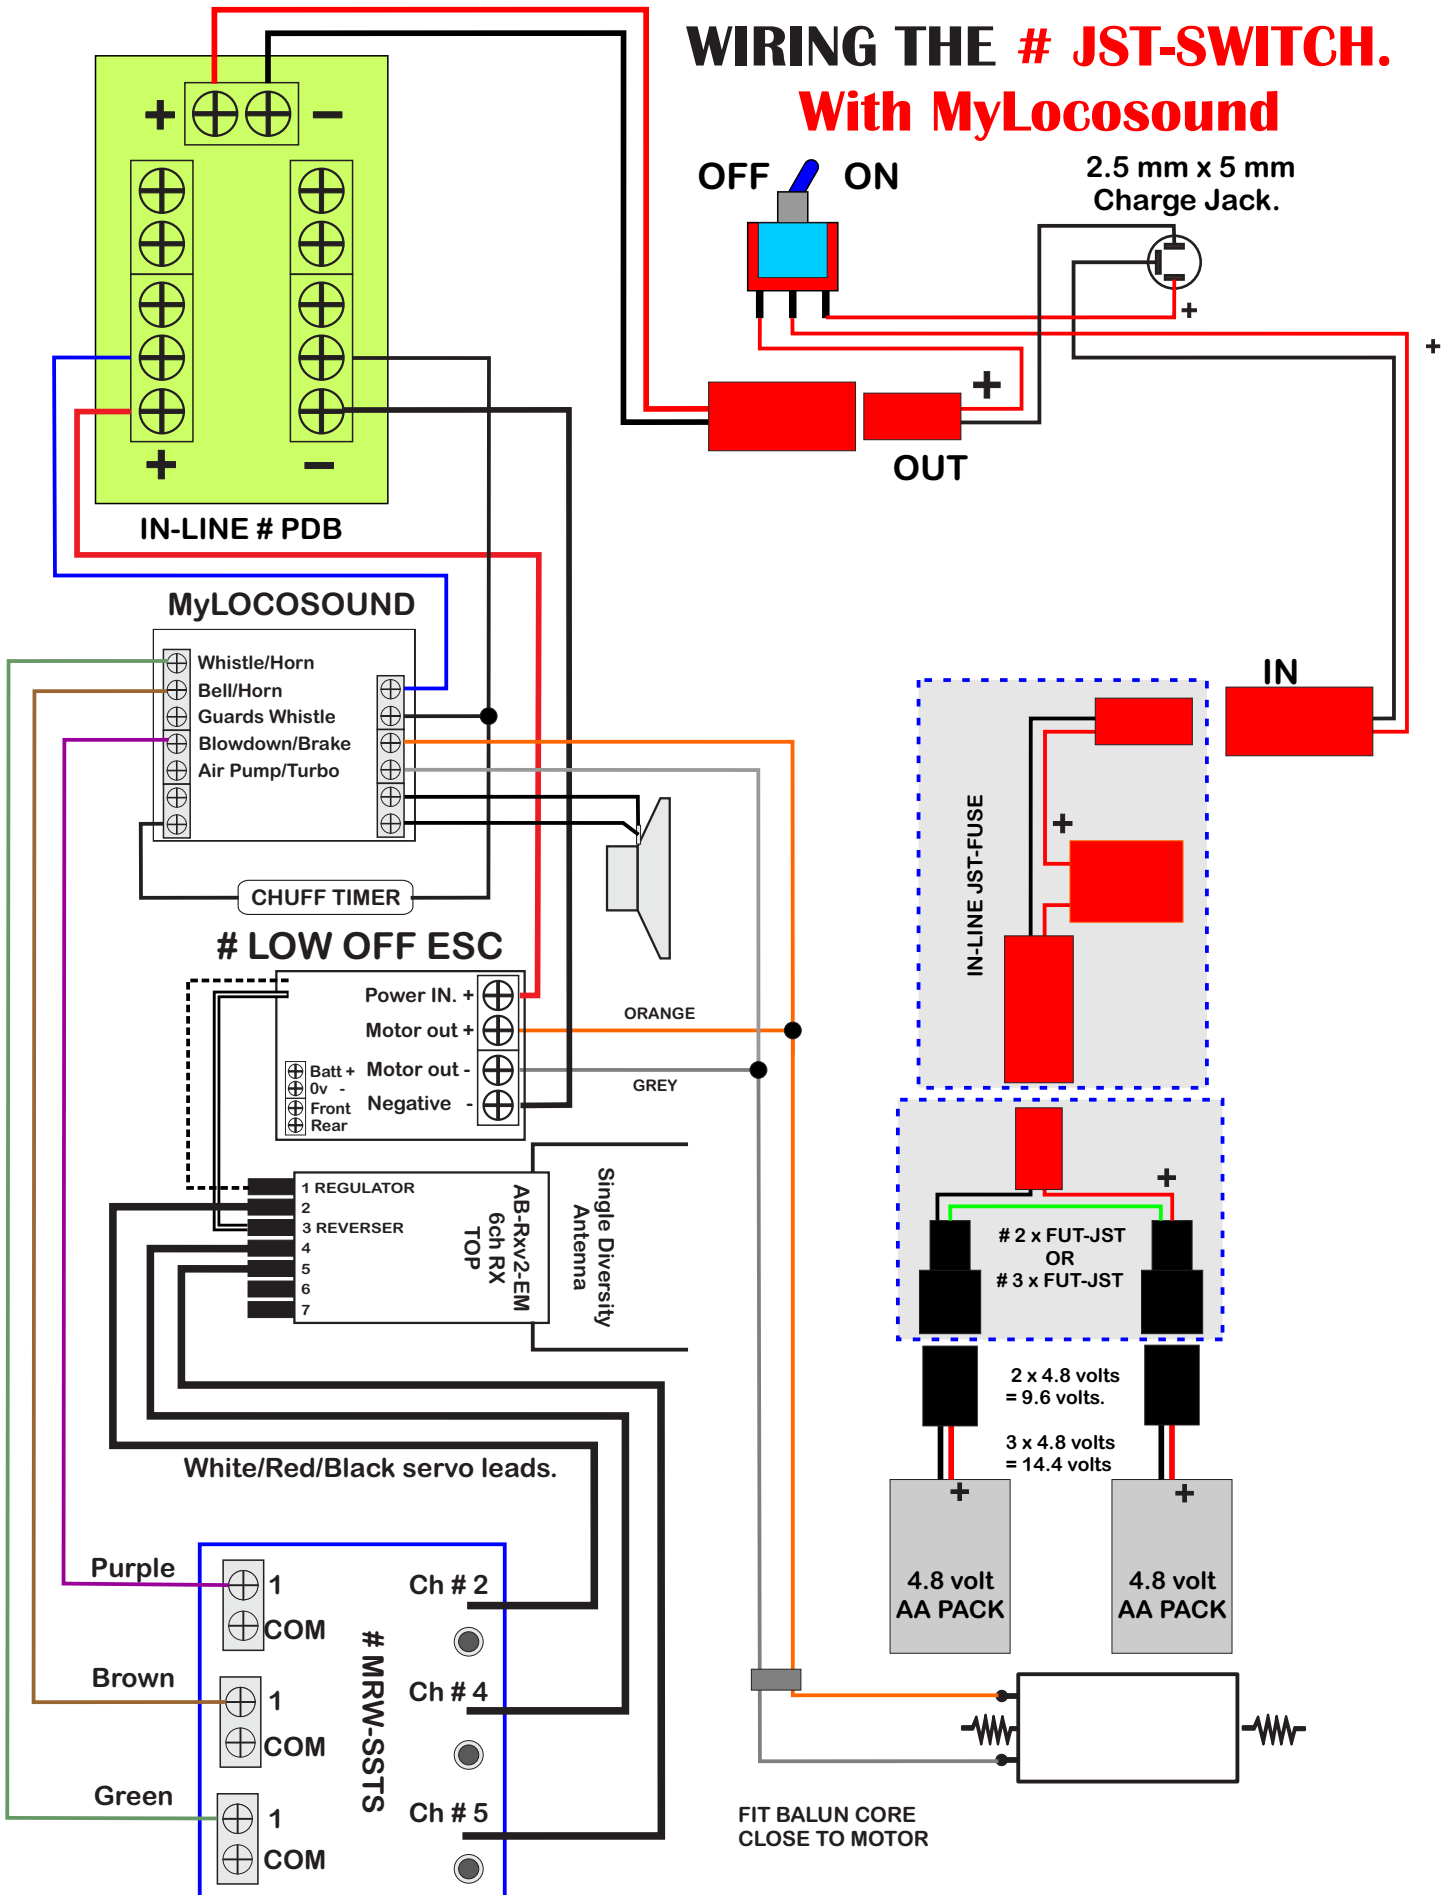

WIRING THE # JST-SWITCH.

SWITCH IS SHOWN IN THE ON POSITION.
